

Web-Based Telephone Voice Broadcast System

Upload a list of phone numbers or type the numbers into the system

Create a message using our web-based text to speech technology or upload a previously recorded message

Have Call Blaster immediately deliver your message to the list of phone numbers provided or schedule the calls for a later time

Build your own custom surveys and capture responses using touch-tone input

Detailed reports track call results and survey responses

All web based meaning NO equipment to purchase or phone lines to order

Ideal for broadcasting information, providing emergency alerts, collecting on past due accounts, product training and conducting snap surveys

Website Interface

Easy to Use

Log into the Call Blaster website, type in the message you want to play and upload a list of phone numbers you want contacted.

Call Blaster will turn your typed message into a phone message and deliver it over the telephone to the numbers you uploaded.
